PRODUCT INFORMATION

Rolleiflex MiniDigi AF 5.0

Classic duo to fit into any vest pocket

Two eyes focus better: tradition in optics and precision mechanics are common to both Rolleiflex and MINOX – with the new edition of the Roleiflex MiniDigi the miniature camera specialist from Wetzlar has revitalized a legend. Featuring fine body detail in a classic black design and a special "Italian red" edition, these miniature cameras draw all the attention. The only thing that has grown in this reproduction of the popular small classic camera is the technical data: an autofocus lens, a 1.1" inch monitor in the waist-level viewfinder as well as an image resolution of up to 5 megapixels ensure more photographic fun and maximum performance within the smallest space!

With this fully functioning, high precision replica of the famous Rolleiflex 6x6 camera (scale 1:2) MINOX presents yet another exclusive design and technical highlight in an outstanding pocket camera. Many functions and details reproduced to scale create that true Rolleiflex feeling when shooting photos! Just like the square negatives produced using the original Rolleiflex, with this camera the photographer has square format digital photos with a resolution of up to 5 million pixels. Many individual features have been reproduced in explicit detail and to scale, making this minaturized Rolleiflex a very much sought after item for collectors and users. Rollei enthusiasts will particularly appreciate these fine details and special features. The subject can be selected in the waist level finder with LCD monitor and captured on the miniSD Card at the press of a button. The camera is mechanically prepared for the exposure of the next shot by turning the typical, metal hand crank that is integrated in the right-hand side. The autofocus lens adjusts the right sharpness and allows close-up shots from a distance of just 10 cm. The provided 256 MB miniSD Card can store up to 250 pictures of the highest resolution.

Weighing just 100 grams the sturdy metal body boasts top-class manufacturing down to the last detail. The camera comes with a strap, a 256 MB miniSD Card as well as a CR-2 lithium battery.

Technical Data

Image Sensor	3.0 Megapixels CMOS (square format) / 5.0 Megapixels interpolated
Image resolutions	2,304 x 2,304 pixels (interpolated) / 1,536 x 1,536 pixels / 768 x 768 pixels
Aperture	f = 2,8
Focus	4,9 mm (corresponds to approx. 29 mm with 35 mm format)
Shutter speeds	1/15 – 1/2500 sec (electronic)
White balance	automatic
Display	1.1" TFT Color Display LCD
Storage medium	miniSD Card up to 4 GB
Language (menue)	English
System requirements	Windows 2000/ME/XP/Vista; Mac OS 9.0 or later versions
Power	CR2 Lithium Battery
Dimensions	1.92 x 2.87 x 1.77 inches / 49 X 73 x 45 mm
Weight	3.52 oz / 100 g (incl. Battery)
Scope of Delivery	CR2 Lithium Battery, miniSD Card (256 MB) incl. adapter, strap, manual
Order number	**Black: 60649 / Red: 60650**
